This lobbying has to stop! If The National Association of Broadcasters doesn't want to be put out of business, then they need to come up with something BETTER and/or CHEAPER than XM (perhaps digital radio??). The local weather and traffic that XM offers is the best I've seen/heard. It's the most up-to-date of anything I know of. Here in Washington, DC, we have www.wtoptraffic.com and www.washingtonpost.com (account required...) and XM. XM is far superior in terms of accuracy and speed to update.
